PROFILE

Over 9 years of experience in game and interactive application development, spanning Unity 3D, Cocos Creator, and Vue 3 web development. In recent years, focused on Vue 3 / TypeScript web games, real-time messaging, live-streaming interactivity, and embedded SDKs. Skilled in front-end/back-end API integration, complex state management, real-time WebSocket data streaming, Web Components / Vanilla JS SDK packaging, and CI/CD build and deployment — capable of independently driving products from feature design and development through to release.

TECHNICAL SKILLS

- **Frontend:** Vue 3, Cocos Creator 3.x, TypeScript, JavaScript, HTML / CSS.
- **Architecture & Integration:** Pinia, RESTful API, WebSocket, Web Components.
- **Real-time & Media:** BytePlus RTM, WebRTC, real-time chat rooms, danmaku (on-screen comments), low-latency live-streaming interactivity.
- **Cloud Deployment & Operations:** Cloudflare Workers, Cloudflare Pages (Static Site Deployment), Cloudflare Zero Trust, Render (Backend Service Deployment).
- **CI/CD & Tools:** Git、Woodpecker CI/CD、Drone CI/CD、GitLab Runner、Jenkins.

WORK EXPERIENCE

Sentinel Software Co. - Game Development Engineer

2024/02 - 2026/08

- Participated in the development of web-based games and interactive products, responsible for Vue 3 front-end features, UI/UX interactions, and front-end/back-end integration.
- Built real-time interactive features, integrating WebSocket, live streaming, and chat/danmaku (on-screen comment) data flows.
- Participated in product build, deployment, and CI/CD pipeline maintenance.

Ding Shun Digital Technology Co. - Game Development Engineer

2022/09 - 2023/12

- Responsible for front-end development of Cocos Creator web games, integrating UI, animations, WebSocket, and back-end APIs.
- Participated in GitLab Runner CI/CD automated builds and web release deployment.

Phoenix Digital Technology Co. - Game Development Engineer

2020/12 - 2022/08

- Responsible for game client development using both Unity 3D and Cocos Creator engines, supporting iOS, Android, and Web platforms.
- Integrated in-app purchases, APIs, UI interactions, and multi-platform build pipelines.
- Participated in Jenkins CI/CD automated builds, version compilation, and app store releases.

O-PA Technology Co. - Game Development Engineer

2017/11 - 2020/11

- Responsible for developing dual-platform (iOS/Android) games and AR applications using Unity 3D, covering UI, animation, API integration, ARCore, and particle effects.
- Completed version compilation, testing, and app store releases for both iOS and Android.

PORTFOLIO

TETRIS

Tech: Cocos Creator, TypeScript, Web, Multiplayer

- Independently developed a complete web game featuring Marathon, Player vs. Computer, and Player vs. Player modes.
- Built the game flow, UI, music/sound effects, key bindings, win/loss feedback, and multiplayer battle data transmission.
- Leveraged back-end services to support real-time battle data exchange between players.

Taichung House Analyst

Tech: Vue 3, TypeScript, Web Scraping, LINE Notifications

- Built a recurring real estate data monitoring and filtering system, handling duplicate listing detection and condition-based data processing.
- Provided map view, actual price registration (實價登錄) lookup, and analysis access, with a blacklist mechanism to manage uninteresting listings.
- Detected new listings and price changes, proactively sending notifications via LINE messages.

Ubus Ticket Checker

Tech: Vue 3, TypeScript, LINE Notifications

- Built recurring monitoring for specified train/flight schedules, tracking booking status and remaining seats.
- Sent proactive LINE notifications when conditions were met, reducing the cost of manual checking.
